

## BUSINESS AND TECHNOLOGY CONSULTING SERVICES

# HOLISTIC CLOUD STRATEGY

*A framework for decision*

Cloud solutions are at the CORE of digital transformation. A successful journey requires a holistic business approach where organisations 'rethink' business aspects beyond the cloud-based solution:

### Key steps for a holistic cloud strategy

#### Identify your business drivers & objectives

Achieve maximum flexibility  
Process standardisation, governance and compliance

Reduce costs: configuration, management and control

Speed and agile implementation

Improve data quality and user experience

Enable new capabilities to meet market demands

Integration Strategy

#### Adoption Assessment

Gap and system lifecycle analysis

Examine and map current workloads and business processes to determine infrastructure readiness

Organisation and people skills and capabilities

Architectural requirements and technical priorities : incorporate cloud into your IT portfolio strategy and identify the IT improvements required to implement the cloud solution

Cost factors, operational vs. capital expenditure

Business impact

#### Design the Strategic Plan

Cloud solution design

Define the Business Case :

- TCO - Total Cost of Ownership
- ROI - Return on Investment
- Cloud business value

Define the management framework for the operational environment

Define the governance and organisational impact

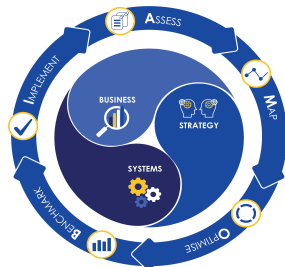

Data unification, integration of transactions and process optimisation

Align and integrate business process, people roles and capabilities within the new solution

### VIP Apps Consulting differentiators

VIP Apps Consulting builds on more than a decade of successful experience delivering process improvements alongside enterprise IT solutions in several industries. As a multidisciplinary team of business and application specialists, we work as business solution integrators.

Our Business and Technology Consulting Services simplify the adoption of a cloud-based solution, by proposing an implementation roadmap that aligns with your long and short-term initiatives.

Supported by our unique AMOBI methodology, we assess your people and current processes, developing the best organisational model for your IT and Finance roles within the new application environment.

Our methodology reduces complexity and enables a comprehensive approach, identifying the key pain points and opportunities for simplification and optimisation, aligning the technology solution to your business and technology drivers: cost, growth, agility and efficiency.
