

We are a global team of industry and technology experts, with extensive capabilities in innovative technology solutions helping our clients transform their businesses and embrace innovation for better business outcomes.

## Core Expertise & Services

Operating in the intersection of technology and business, we combine deep business and industry insight with the understanding of how technology and innovation impact the industry and business models. We provide holistic business and technology-focused solutions that create maximum value and return on technology spend.

Our end-to-end solutions span from the technology solution design through to the implementation.

Optimisation

## AMOBİ

Our proprietary methodology is a structured process to continuously assess and optimise business strategy, team, processes and systems. All these factors are as critical as the technology solution selection.

## Implementation

Project Management

Solution Development & Deployment

Seamless Migration

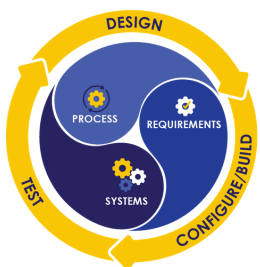

Change Management & Training

DELIVER is the VIP Apps Consulting multi-disciplinary framework for technology implementation, business transformation and migration projects.

It provides a blueprint set of tasks with supporting tools, proprietary methodologies, industry-specific templates, and leading practices that increase project visibility, drives efficiency, and lowers the cost of technology solutions implementations.

The DELIVER framework is comprised of seven phases from Discover through Run combining the standard waterfall with an Iterate agile approach to design/configure & develop/test.
